Have you had a recent bone density assessment? Yes _____ No _____

If yes, please attach a recent bone density scan with the doctor's interpretation.

BONE DENSITY TESTING REQUIREMENTS

Our new clients over 60 years of age and/or 6 months post injury/re-injury must have a bone density test (Densitometry or DEXA scan) completed and have the results and doctor's interpretation sent or faxed to us. This result will show us if there is increased risk of fracture due to osteopenia or osteoporosis and determine program viability. It's important that you know this as well for your general health and well-being.

The test should include T scores of the Lumbar spine, Right and Left Hips, Greater Trochanter, and Distal Femur. If you have had a bone test performed in the last 6 months, you don't need to have another one done, but you still need to send or fax us the results. Follow-up requirements for subsequent testing will be determined by these initial test results.

We need to have this report prior to scheduling your initial evaluation appointment. Thank you.
